Problem?

B inspection, setup new R31

Task performed:

1. B Inspection.
2. Perform B Inspection.
3. Continued B Inspection.
4. Checked over truck for primary air leak down. Found 2 push-in air fittings leaking at air tanks under left side cab steps. Replaced both fittings and recheck. No further leaking.
5. Troubleshoot high idle on continuously. Found high idle is programmed to come on with A/C on and cannot be changed.
6. Began setting up new rescue and mounting equipment.
7. Continued setting up new truck.
8. Continued setting up new truck.
9. Continued setting up new truck.
10. Continued setting up new truck.
11. Continued setting up new truck.
12. Continued/completed new truck set up. Also, checked over and did finishing touches on all other 5 new Rescues.
