

Outdoor Grilling

Keep safety in mind when setting up, using, and cleaning up after an outdoor grill or fire pit

Only use your grill outside on a non-combustible surface.

10 feet away from siding, deck rails, and open doors or windows.

Open your gas before lighting.

One-pound propane cylinders are the least hazardous fuel source.

Keep a three-foot kid and pet safety zone around your grill and fire pit.

Make sure starter fluid, lighters and matches are stored out of children's reach.

Clean your grill after each use- this will help remove excess grease.

Use proper tools - long handled barbecue utensils and flame retardant mitts to help prevent burns.

When finished, turn off both the grill and the propane cylinder.

Place coals in a metal can with a lid once they have cooled.

Always keep an eye on your grill, fire pit and patio torches.
