EXPLANATION

Areas of 100-year flood; base flood elevations and flood hazard

factors not determined Areas of 100-year shallow flooding where depths are between one (1) and three (3) feet; average depths of inundation are shown, but no flood hazard factors are determined.

Areas of 100-year shallow flooding where depths are between one (1) and three (3) feet; base flood elevations are shown, but no flood hazard factors are determined.

A1-A30 Areas of 100-year flood; base flood elevations and flood hazard factors determined

Areas of 100-year flood to be protected by flood protection system under construction; base flood elevations and flood hazard factors Areas between limits of the 100-year flood and 500-year flood;

or certain areas subject to 100-year flooding with average depths less than one (1) foot or where the contributing drainage area is less than one square mile; or areas protected by levees from the base flood. (Medium shading)

Areas of minimal flooding. (No shading)

С Areas of undetermined, but possible, flood hazards. Areas of 100-year coastal flood with velocity (wave action); base flood elevations and flood hazard factors not determined.

Areas of 100-year coastal flood with velocity (wave action); base

notes to user

Certain areas not in the special flood hazard areas (Zones A and V) may be

flood elevations and flood hazard factors determined.

This map is for use in administering the National Flood Insurance Program, it does not necessarily identify all areas subject to flooding, particularly from local drainage sources of small size, or all planimetric features outside special flood

The coastal flooding elevations shown may include the effects of wave action and differ significantly from those developed by the National Weather Service for hurricane evacuation planning.

Coastal base flood elevations apply only landward of the shoreline shown on

Corporate limits shown are current as of the date of this map. The user should contact appropriate community officials to determine if corporate limits have changed subsequent to the issuance of this map.

For adjoining map panels, see separately printed Map Index.

INITIAL IDENTIFICATION: JUNE 17, 1970

FLOOD HAZARD BOUNDARY MAP REVISIONS:

FLOOD INSURANCE RATE MAP EFFECTIVE:

FLOOD INSURANCE RATE MAP REVISIONS: Map revised October 15, 1982

to change zone designations, and base flood elevations reflecting wave action effects, and to change special flood hazard areas, corporate limits, and scale. Map revised June 2, 1992

to incorporate Coastal Barrier Resource System areas and/or otherwise protected areas.

To determine if flood insurance is available in this community, contact your insurance agent, or call the National Flood Insurance Program, at (800) 638-6620.
