

2009 BIENNIAL UPDATE

LAW ENFORCEMENT IMPACT FEE

Overview:

Law enforcement impact fees are assessed on both residential and non-residential development. The law enforcement impact fee is calculated by multiplying the capital cost per call by the average number of calls per parcel.

Explanation:

The key determinants of the fee are costs per call and the number of calls for law enforcement assistance per parcels. Law Enforcement's capital cost is taken directly from fixed assets reports. This number is found in the input.

Capital Investment – \$123,774,771

Call load – 704,326

Cost per call - \$93.81

Backup data supporting these law enforcement input is available on the web under Support Data.
