- Tables 3 and 4:** Palm Beach County Service Agencies
- Table 5:** Palm Beach County Interlocal Agreements with Needed Updates

I. INTRODUCTION

Palm Beach County was established in 1909, and is the largest of the 67 counties in the State of Florida. It is located in the subtropical, southeastern portion of the State known as the "Gold Coast" that consists of Dade, Broward and Palm Beach counties. The eastern County has a thriving urban area while the western area of the County is more rural with wetlands covering the southwestern part and agriculture dominating the northwestern end. There are 37 municipalities and 64 special districts in the County.

Palm Beach County's total area is 2,386 square miles. Its land area is 1,974 square miles and water area is 412 square miles. The water area includes a portion of Lake Okeechobee which is the largest freshwater lake inside the State and ranks as one of America's largest lakes. Palm Beach County's shoreline along the Atlantic Ocean extends 45 linear miles north to south.

According to the 2000 Census, the total year-round population of Palm Beach County is 1,131,184. The estimated additional seasonal population is 123,725. The year-round and seasonal population combined totals 1,254,909. Among the 1,131,184 permanent residents, 521,447 or 46% reside in the unincorporated area and 606,737 or 54% reside in the incorporated area that consists of 37 municipalities. Per the 2000 Census, the County's three western Glades communities have a total of 24,750 permanent residents (4% of total incorporation population).

II. PALM BEACH COUNTY GOVERNMENT OVERVIEW

Charter Government

In the November 6, 1984, General Election, Palm Beach County residents voted to expand the legislative authority of their County Government by adopting a "Home Rule" Charter. The Palm Beach County Charter went into effect January 1, 1985, and introduced four major changes to County Government.

The Palm Beach County Charter:

1. Establishes true Home Rule which allows the County to pass its own ordinances and laws as long as they do not conflict with state or federal laws.
2. Provides initiative procedures that allow voters to:
 - a. Create new local laws.
 - b. Modify or amend local laws.
3. Provides a process to modify or amend the Charter.
4. Provides voters with a process to recall County Commissioners for cause.

The Legislative Branch

The seven-member Board of County Commissioners is the legislative governing body of Palm Beach County. Each Commissioner is elected to a four-year term by voters in the district in which they reside. Commission members take office two weeks after they are elected in the November General Elections. Every two years, Commission members elect a chairman to preside over the County Commission meetings and to serve as ceremonial head of the County. A vice-chairman is also selected to assume these duties in the absence of the chair.

The Palm Beach County Charter and Chapter 125.01 of the Florida Statutes establish the specific duties and powers of the Board of County Commissioners. Exercising their legislative powers, the County Commission adopts ordinances (local laws) and resolutions to establish

policies and programs to protect the health, safety and general welfare of Palm Beach County residents.

The County Commission considers major problems facing County government and guides the growth and development of the County to be consistent with the public interest. Some of the specific duties undertaken by the Board include:

- Provide fire protection and disaster relief services.
- Provide for the construction and maintenance of County buildings, roads and bridges.
- Provide programs for housing, community redevelopment, slum clearance, conservation, flood and beach erosion control and air pollution control.
- Adopt and enforce building and housing codes and regulations.
- Prepare, enforce and periodically review the Comprehensive Plan for the development of the unincorporated area of the County.
- Provide cultural and recreational facilities and programs.

In addition, the Board of County Commissioners may enter into agreements with other governmental agencies for joint performance of duties.

The Administrative Branch

The County Commission appoints the County Administrator and assigns to the Administrator executive responsibilities and powers to implement its policies. Under the direction of the County Administrator, over 20 departments and offices combine their efforts to provide County residents with needed services, information and programs.

Advisory Boards, Committees and Councils

The Board of County Commissioners appoints County residents to serve as volunteers on various citizens' boards, commissions, committees and councils. These groups are established for advisory and/or regulatory purposes. State law requires that some advisory boards exist; others are formed by the County Commission to meet special needs and to help solve the challenging issues facing County government.

Constitutional Officers/Judiciary

Constitutional Officers and the Judiciary are those County officials, who are elected by the voters and operate independently from the Board of County Commissioners. The Clerk of the Circuit Court, Property Appraiser, Sheriff, Supervisor of Elections, Public Defender, State Attorney and the Tax Collector are Constitutional Officers elected to serve four-year terms. Constitutional Officers establish the budgets for their offices, independent of the budget established for offices under the jurisdiction of the Board of County Commissioners. However, Constitutional Officers work in cooperation with the Commission in order to serve citizens of the County efficiently and cost-effectively.

Independent Taxing Districts

Palm Beach County is not a consolidated or "metro" form of government. The South Florida Water Management District, the Children's Services Council, the Health Care District, drainage districts, inlet districts and the 37 municipalities within the County also are not under the authority of the Board of County Commissioners. The Palm Beach County School System is governed by a non-partisan elected School Board and operates under the direction of a School Board-appointed superintendent. The County Commission has no jurisdiction over the School Board or its budget.

III. SERVICE PROVISION IN PALM BEACH COUNTY

Education

The School District of Palm Beach County oversees the operation of the County's elementary, middle and high schools. The School District is also the largest employer in Palm Beach County with more than 14,000 employees. Education numbers as of June 2000, show a total enrollment of 176,335: public school 149,764 (85%); private school 23,863 (14%), and home school 2,708 (1%).

Palm Beach County, the School District of Palm Beach County, and 26 participating municipalities within the school district have chosen to implement public school concurrency, based on procedures established in the statutes of the State of Florida. School Concurrency provides coordinated planning among the County, local governments, and the School District to ensure that school capacity is available at the time of impact of residential development. The interlocal agreement to establish school concurrency in Palm Beach County was executed and officially recorded on January 25, 2001.

Transportation

Transportation service includes all major modes of travel, encompassing both capital facilities (e.g. roads, ports) and operational services (e.g. fixed-route transit, paratransit. Transportation facilities and services are provided by several agencies and departments throughout Palm Beach County. The Florida Department of Transportation (FDOT) maintains and manages state-owned roadway transportation facilities and associated traffic control equipment and adheres to Level of Service standards selected to ensure adequate roadway capacity. The Palm Beach County Engineering and Public Works Department maintains and manages County-owned roadways and traffic control equipment, and similar to the FDOT, adheres to Level of Service standards to ensure adequate provision of service (roadway capacity). Local municipalities maintain municipal-owned roads, and improvement districts maintain many miles of residential, exurban roads.

Beyond roadway facilities, other transportation modes have distinct service providers. These include Tri-Rail (Tri-County Commuter Rail Authority) which provides commuter rail service along a north-south railroad corridor largely paralleling Interstate 95; the Port of Palm Beach, which provides a modal point for ship-based transportation and cargo service; Palm Tran, the fixed-route transit service provider within the county; Palm Tran Connection, the paratransit provider; and the Palm Beach County Department of Airports, which manages and oversees the provision of airport facilities for commercial passenger, cargo, and private plane flights. Water taxi service is available via private service, as is regular roadway-based taxi service.

The following provides summary of the Palm Beach County transportation system:

1. Management of Transportation System - The County's on-going effort to maintain and implement a safe and efficient transportation system is a key foundation for all transportation planning within the County. Policies exist for implementing Transportation System Management (TSM), Transportation Demand Management (TDM), and land use/transportation coordination strategies. Policies also exist for alleviating high accident locations and for controlling access connections. Further, a new policy is in place for developing a County Task Force to assess the County's current transportation planning principles.
2. Roadway System - Level of service standards are defined for the Palm Beach County roadway system. Exceptions to the level of service standards exist for identified cases

which meet specific Transportation Element criteria, such as very low and low income housing developments, Constrained Roadway at Lower Level of Service (CRALLS) and other select facilities, select geographic areas, Transportation Concurrency Management Areas (TCMAs), and Transportation Concurrency Exception Areas (TCEAs). The Palm Beach County's adopted Thoroughfare Right-Of-Way Identification Map is the basis for the preservation of roadway right-of-ways within the County. This map is a long-range planning tool which identifies the network of roadways required to meet future traffic demands. The map depicts roadways maintained by the State and County, as well as select roadways maintained by municipalities. Roadways are identified by name, width, and termination points. The Thoroughfare Right-Of-Way Identification Map serves as the premise for future roadway system expansions proposed for the Year 2020 Cost Feasible Plan of the Year 2020 West Palm Beach Urban Study Area (WPBUSA) Plan Update. The Year 2020 Cost Feasible Plan provides for reasonable Palm Beach County Page 3 - TE 1989 Comprehensive Plan Revised 12/18/02 Ordinances 2002 - 41-45, 47, 48, 72-76, 78, 90 level of service operations for the year 2020, based on projected available financial resources.

3. Transit System - Palm Tran, the Surface Transportation Department of Palm Beach County, is the sole provider of fixed route and complementary paratransit public transportation in the County. With the increase in revenue devoted to mass transit, Palm Beach County has instituted a complete upgrading of infrastructure. This has resulted in significant increases in the number of buses and the number and extent of bus routes. Palm Tran is increasing ridership as a result of these improvements. Nevertheless, the County has a transit modal split of less than one percent. Therefore, this element provides policies that promote additional mobility alternatives to automobile use. These include Palm Tran and Spectran services, Tri-Rail, ridesharing coordination programs which result in car and van-pooling, High Occupancy Vehicle (HOV) lanes designed for car pooling, park-and-ride lots, and designated bikeways. The State owned South Florida Rail Corridor (formerly owned by CSX) which runs from West Palm Beach to Miami, has an on-going program to add a second track (double track) to the current single line system. A Double Track Master Plan has been developed by the State to identify where the second track is to be constructed.
4. Paratransit Services - A major reorganization is occurring in Palm Beach County in regard to how both ADA and transportation disadvantaged paratransit services are delivered. For individuals who qualify for 'Americans with Disabilities Act' paratransit services, Palm Tran is revamping their Spectran Division to provide specialized transportation for both services.
5. Airport Facilities - Airport Master Plans exist for the County operated Palm Beach International Airport, Palm Beach County Park Airport, Palm Beach County Glades Airport, and North Palm Beach County General Aviation Airport. Future expansions of these airports are to be performed relative to the Master Plans and include an analysis of the compatibility of future land uses around airports. Impacts of the non-County operated airports of Belle Glade State and Boca Raton airports on the County operated airports are also to be monitored.
6. Port of Palm Beach - Palm Beach County has incorporated the Port of Palm Beach Master Plan into its Comprehensive Plan and shall seek to achieve consistency and coordination between the Master Plan and this Comprehensive Plan. However, by its adoption of the Port Master Plan, the County does not necessarily subscribe to all its findings and recommendations.

Parks and Recreation

Parks and Recreation service is provided by Palm Beach County, its municipalities, and some special districts. The Palm Beach County Parks and Recreation Department has 51 developed parks (many with water sports and beaches), four swimming pools, three campgrounds, two golf courses, equestrian facilities, ball fields, fitness trails, and hundreds of handball, racquetball and tennis courts.

Potable Water and Sanitary Sewer

Southeast Florida is a region where appropriate management of water resources is critical for the future sustainability of the region. This region encompasses a fast and steady growing population, some of the most important agricultural industries in the country, and last but not least, a fragile natural environment which includes the Everglades National Park and its supporting regional ecosystem. The region's water resources need to be planned and managed in order to respond to the competing needs of the growing population, the continuation of agriculture and the preservation and enhancement of the region's natural resources. Palm Beach County is participating in and closely following the diverse regional programs addressing the future of water resources and water supply in the region.

Palm Beach County residents obtain potable water and wastewater services through a variety of service providers. The Palm Beach County Water Utilities Department provides potable water and sanitary service to portions of unincorporated and incorporated County. Other portions of unincorporated County and municipalities receive service either from municipalities or private franchises or special districts. The exceptions are the municipalities of Greenacres City where potable water and wastewater services are totally provided by the Palm Beach County Water Utilities Department; the City of Atlantis, the towns of Haverhill, Cloud Lake and Golfview, and a portion of Lake Clarke Shores where potable water is also provided by Palm Beach County Water Utilities Department.

Package treatment plants serving labor camps and sugar industry sites are also present in unincorporated Palm Beach County areas in the Glades. Palm Beach County prohibits the use of package treatment plants in the urban and limited urban service areas, while allowing restricted use of package plants in the Everglades Agricultural Area and in other areas dedicated to agricultural production, in order to provide wastewater service to bonafide agricultural uses and to essential public facilities.

Solid Waste

The Solid Waste Authority of Palm Beach County is a Dependent Special District, created by a Special Act of the Florida Legislature in 1974. The mission of the agency is to provide a County-wide integrated system for the recycling, recovery and disposal of solid waste.

The Authority provides disposal infrastructure, through Transfer Stations and disposal facilities for solid waste generated within the county. The Authority provides infrastructure for the processing of recyclable materials collected countywide through residential recycling programs.

The Authority is responsible for the collection of solid waste in the unincorporated areas of the county, which it accomplishes through competitively bid franchise collection agreements with private sector waste haulers. Individual municipalities are responsible for the collection of solid waste within their jurisdictions.

Public Safety

Public safety services are described under *Emergency Management, Sheriff and Police Protection, and Fire-Rescue Service*, below.

Emergency Management

Palm Beach County Division of Emergency Management (DEM) is responsible for reducing the effects of potential disasters before they occur, planning for and coordinating the operations and response to a disaster, managing resources and coordination of recovery efforts following a disaster as well as providing public education and information. We work with over 100 different local, volunteer, state, and federal organizations on an ongoing basis, and after a disaster to ensure that the Palm Beach County Emergency Response Team is prepared to help the citizens of Palm Beach County survive any disaster.

The Planning Unit has responsibilities to coordinate with over 90 partner agencies to ensure that Palm Beach County is prepared to respond to a large-scale disaster. The four persons staff creates, maintains, trains, exercises, and updates the Comprehensive Emergency Management Plan which outlines the primary roles and responsibilities of all TEAM members. Individual supporting documents and Standard Operating Procedures are also maintained such as:

- Comprehensive Emergency Management Plan
- Regional Evacuation Coordination Procedures

The Operations Unit is responsible for coordinating and supporting the response efforts of the numerous partner agencies needed to mitigate the effects of a natural or manmade disaster within Palm Beach County. Operations Unit personnel are tasked with assuring plans are implemented, objectives are achieved, and the incident is managed effectively.

The nine person staff also maintains the County Warning Point and operates the EOC Communications Center. The Communications Center is staffed throughout the year, around the clock, and provides monitoring, notification, and warning to the emergency response team, municipal organizations, the State Emergency Operations Center, and other partner agencies with emergency response roles. Emergency notifications to the public are made through the Emergency Alert System and a telephone call down system. The mobile command post known as "ECOMM" provides direct support to response agencies in the field.

Palm Beach County Local Mitigation Strategy (LMS), is a hazard mitigation program that has been funded by the Florida Department of Community Affairs (FDCA) with Federal Emergency Management Agency (FEMA) funds for the development of comprehensive mitigation planning. The purpose of the Palm Beach County LMS is to develop a unified approach among County and Municipal governments for dealing with identified hazards and hazard management problems in the Palm Beach County Area. This Strategy will serve as a tool to direct the County and Municipal governments in their ongoing efforts to reduce vulnerability to the impacts produced by both the natural and man-made hazards. The Strategy will also help establish funding priorities for currently proposed mitigation projects and develop priority mitigation projects to be completed with such disaster assistance (mitigation) funds as may be made available after a disaster. The ultimate objectives of the LMS process are to:

- Improve the community's resistance to damage from known natural, technological, and societal hazards;
- Place Palm Beach County in a position to compete more effectively for pre and post-disaster mitigation funding;
- Reduce the cost of disasters at all levels; and

- Speed community recovery when disaster occurs.

The office of Emergency Medical Services is responsible for managing a system through which the Board of County Commissioners can provide pre-hospital emergency medical services to critically ill or injured patients in Palm Beach County. The EMS staff monitors EMS agencies to ensure compliance to state and local laws; maintains a dependable EMS communications system; provides staff support and guidance to the EMS Council in planning and regulatory matters; and coordinates and maintains an accurate E-911 data base and operations oversight. Palm Beach County entered into interlocal agreements to establish a method for reimbursing municipalities for expenses in the operation of their 91-1 Public Safety Answering Points (PSAPs) as permitted by the Florida Emergency Telephone Act (F.S. 365.171). Allowable expenses include certain equipment related to the answering of 91-1 calls and call-takers salaries. Expenses are annually budgeted for each PSAP and reimbursement is made when the municipality provides a vendor invoice and proof of payment out of the E 9-1-1 fund.

EMS Responders to 9-1-1 calls:

Atlantis Police Department
 Belle Glade Police Department
 Boca Raton Police Department
 Boynton Beach Police Department
 Delray Beach Police Department
 Greenacres Public Safety
 Jupiter Police Department
 Lake Park Police Department
 Lake Worth Police Department
 Lantana Police Department
 Manalapan Police Department
 North Palm Beach Public Safety Department
 Ocean Ridge Public Safety
 Palm Beach Police Department
 Palm Beach County Sheriff's Headquarters
 Palm Beach County Sheriff's Glades Substation
 Palm Beach County Fire-Rescue
 Palm Beach Gardens Police Department
 Palm Beach Shores Police Department
 Palm Springs Public Safety Department
 Riviera Beach Police Department
 Royal Palm Beach Police Department
 Tequesta Police Department
 West Palm Beach Police Department

Sheriff and Police Protection

As the County's chief law enforcement agency, the Palm Beach County Sheriff's Office (PBSO) assumes the leadership role in providing progressive and responsive law enforcement services in our multicultural community. PBSO provides law enforcement services to an estimated unincorporated and contract population of 611,618. The remainder of the County's population is served by 29 municipal police departments.

The Palm Beach County Sheriff's Office currently employs 3,195 staff, comprised of 1,169 sworn law enforcement, 658 sworn corrections, and 1,368 non-sworn support staff. At the direction of the Sheriff, the Undersheriff oversees four departments - Law Enforcement, Corrections, Administration and Organizational Development.

Law Enforcement manages Patrol Operations, Investigative Services, and Special Operations. There are currently ten districts and numerous satellite and neighborhood offices. The department handled over 731,000 calls for service in 2002. Law Enforcement also administers community related initiatives.

Corrections oversees inmate Security and Operations. Security is responsible for inmate management at three facilities and the Operations function includes inmate processing and support services. The three facilities have a total bed capacity of 1,326 and the average daily population for 2002 was 2,471.

Administration is responsible for support services including Accounting, Facilities and Vehicle Maintenance, Information Systems, Information Technology and Purchasing. Organization Development oversees Budget, Human Resources, Planning and Research, Radio Services/Telecommunications and Risk Management.

The Palm Beach County Sheriff's Office currently holds accredited status by the state and national accrediting agencies:

- American Correctional Association (ACA)
- American Society of Crime Laboratory Directors/Laboratory Accreditation Board (ASCLD/LAB)
- Commission for Florida Law Enforcement Accreditation (CFA)
- Florida Correctional Accreditation Commission (FCAC)
- National Commission on Correctional Health Care (NCCHC)

Fire-Rescue Service

Fire-rescue service is provided by Palm Beach County and various municipal fire-rescue providers. The Palm Beach County Board of County Commissioners are beginning to address level of service issues related to fire-rescue, and particularly how annexations impact service delivery. A proposed minimum level of service standard is being considered as well as a centralized dispatch system that would provide the closest emergency response unit to all citizens, irregardless of jurisdictional boundaries. A Fire-Rescue Level of Service Committee has been appointed and a consultant hired to review and cost out these proposals. It would be premature at this point to identify specific instances where duplications or deficiencies may exist, since a level of service standard has not yet been agreed upon, from which to base those determinations.

In general terms, however, below are some of the current issues affecting fire-rescue service delivery in Palm Beach County:

- Mixed service areas can create dual responses by both 9-1-1 centers who may receive calls;
- Irregular borders create confusion for emergency responders;
- Some capital facilities may be too closely located to each other where more than one provider could serve the same community;
- Some areas are annexed without the adjacent roadway, leaving a roadway strip in the unincorporated area;
- Annexing properties may, in fact, receive a lower level of service from the annexing municipality than from the previous provider;
- The Fire-Rescue MSTU loses revenue with no corresponding reduction in expenses;

- Cities often annex high value areas with low demand, leaving low value/high demand areas;
- Long-range planning (capital facilities and operational issues) is extremely difficult.

Because of these issues, the Palm Beach County Board of County Commissioners has taken the initiative to pursue mandating a minimum level of service for all fire-rescue providers in the County as well as offering to fund a Central Dispatch System, which would allow for the more efficient deployment of all emergency resources. If these plans are finalized during the next year, inter-jurisdictional conflicts could be reduced, duplications will be eliminated and service delivery will be enhanced to the citizens of Palm Beach County.

Drainage

Drainage service is provided in the County by various providers as depicted in the **Tables 3 and 4: Palm Beach County Service Agencies** document attached.

IV. SERVICE-DELIVERY DEFICITS AND DUPLICATION

None of the reporting agencies identified any deficits or duplication in service, particularly related to interlocal agreements. In many instances, the interlocal agreements came about in order to rectify previously identified deficits or duplications. However, the discussion under Fire-Rescue Service does summarize some of the fire-rescue service related issues in the County.

V. INTERLOCAL SERVICE-DELIVERY REPORT REQUIRED TABLES

The Guidelines for Preparing the Interlocal Service-Delivery Agreement Report issued by the Department of Community Affairs in July 2003 outlines several required tables. Due to the significant number of reporting agencies (103) and the number of applicable interlocal agreements reported (1,523), Palm Beach County has addressed the requirements of the tables in a modified format. The following summarizes the attached tables:

Table 1: Palm Beach County Municipalities and Special Districts – This table provides the name of each reporting agency by Type, and indicates if they have reported applicable interlocals.

Table 2: Palm Beach County Existing and Proposed Interlocal Agreements – This table provides the Agreement Number, Agreement Name, Affected Parties, Effective Date, Status (Active or Pending), as required by the Guidelines. In addition, it provides a brief description of the purpose of each agreement, the Ordinance or Resolution Number, the Expiration Date, and whether updates are needed. The table contains 1,523 agreements sorted by service category. Since many of the agreements are duplicate entries, the Guideline suggested numbering system was not utilized. Once the duplicates are removed, the number system will be applied.

Tables 3 and 4: Palm Beach County Service Agencies – This table summarizes the contact information, service provision, and the duplication and deficits of service required by the Guidelines.

Table 5: Palm Beach County Interlocal Agreements with Needed Updates – This table highlights the two agreements that require updates per the Guidelines.
