EXHIBIT A – Rules of Construction [Rounding of Fractions]

Part	Article	Reasons
1.	ULDC Art. 1.C.1.A.2, Interpretation and Application	[Zoning] Establish standards to clarify how and when the rounding of numbers may be permitted to determine minimum of maximum requirements. Most jurisdictions recognize the common practice of rounding up or down to nearest whole number for itemized requirements such as parking spaces, loading zones, trees, shrubs, etc. that often result in fractions. Example: A use to be located in a 2,277 sf building that requires one parking space for each 200 sf, thus resulting in 11.39 spaces, would be rounded down to 11 parking spaces. Linear or area dimensions typically aren't rounded, with limited exceptions.

EXHIBIT B – Mobile Home Owner Disclosure Requirements to Potential Buyers

Part	Article	Reasons
1.	ULDC Art. 2.A.1.J, Notification	<p>[PZ&B/County Attorney] This amendment serves to establish additional notification requirements for rezoning applications involving the redevelopment of mobile home parks, with the intended purpose of providing additional disclosure to persons who may unknowingly purchase a mobile home dwelling unit without knowledge that future tenancy in the park may be short term. These notification requirements would be applicable to approximately 71 mobile home parks with 13,987 mobile home units within the unincorporated areas of Palm Beach County.</p> <p>Florida Statutes, Chapter 723 “Mobile Home Park Lot Tenancies” establishes and pre-empts to the State, through the Department of Business and Professional Regulation (DBPR), the regulation of the landlord-tenant relationship between mobile home park owners or operators, and the owners of mobile home dwelling units (mobile home) where lots are rented or leased. These laws are intended to mitigate potential inequalities of the mobile home owner who cannot easily relocate, while protecting the rights of both parties. This includes requiring that a park owner identify any known future redevelopment plans within rental agreements, notify each mobile home owner, or an association, if applicable, of any application for a change in zoning within 5 days of filing for rezoning, and provide notice of eviction, with reference to potential eligibility of compensation under the Florida Mobile Home Relocation Trust Fund.</p> <p>However, while there are requirements pertaining to transfer of rental agreements upon the private sale of a mobile home dwelling unit between private parties, there do not appear to be sufficient safeguards to ensure that potential buyers are aware of the aforementioned notifications, which may result in the purchase of a unit that may be required to be removed from the park. While such purchasers may qualify for relocation assistance, in some cases older units cannot be successfully relocated, among numerous other complications.</p> <p>To this end, the additional notification requirements established herein are intended to bridge the current gap until such time as the State may update current laws to address both existing and interim tenancy</p>
2.	ULDC Art. 2.B.1, Official Zoning Map Amendment (Rezoning)	[Zoning] Provide additional references to F.S. 723.083, Governmental Action Affecting Removal of Mobile Home Owners, which is currently located under the Mobile Home Park Development (MHPD) district, to other areas of the Code to ensure that other approvals affecting existing mobile home parks that are not within the MHPD district, are in compliance with statutory requirements
3.	ULDC Art. 2.B.1, Official Zoning Map Amendment (Rezoning)	[Zoning] Provide additional references to F.S. 723.083, Governmental Action Affecting Removal of Mobile Home Owners, which is currently located under the Mobile Home Park Development (MHPD) district, to other areas of the Code to ensure that other approvals affecting existing mobile home parks that are not within the MHPD district, are in compliance with statutory requirements.
4.	ULDC Art. 3.E.6.G, Rezoning of Mobile Home Parks	[Zoning] Clarify that prior reference to Florida Statutes 723.083 applies to all local government actions related to the redevelopment of mobile home parks.

EXHIBIT C – Administrative Approvals Unmanned Retail Structures

Part	Article	Reasons
1.	ULDC Art. 2.D.1.G.1, Modifications to BCC or ZC Approvals	[Zoning] Clarify administrative authority to amend projects approved by the Zoning Commission or Board of County Commissioners, to allow for the addition or modification of an unmanned retail structure, consistent with provisions for the similar Freestanding ATM use. This clarification was inadvertently omitted from the recently adopted Use Regulations Project, where the use was partially established by Board direction to accommodate a freestanding ice dispensing facility. Typically, the addition of a freestanding structure would necessitate a request to the ZC or BCC for a Development Order Amendment (DOA); however, the structures in question are de minimis, and are not anticipated to result in the same impacts as would an occupied freestanding structure.

EXHIBIT D – Article 3.E, Planned Development Districts

Part	Article	Reasons
1.	ULDC Art. 3.A.3, Zoning District Consistency with the Future Land Use Atlas (FLUA)	[Zoning] 1. Correct scrivener’s error in Ord. 2017-007, by deleting a reference to note # “4” related to IPF Zoning District in Table 3.A.3.B, Future Land Use (FLU) Designation and Corresponding Standard Zoning Districts. The text that pertains to the IPF is specified under Art. 3.B.1.m, related to the list of “Standard District Exceptions and Limitations”. 2. Implement recently amended Plan Policy 2.2.1-j (Ord. 2017-004), which clarifies that parcels with the High Residential (RH) Zoning district are consistent with the Medium Residential – 5 (MR-5) future land use designation in place at the time of the adoption of the 1989 Comprehensive Plan. The RH district was consolidated with the Medium Residential (RM) Zoning district in 2003, and the ULDC recognizes that the RH district is consistent with the RM district. The Plan amendment further establishes that eligible parcels with the RH Zoning district shall be exempt from rezoning to the RM Zoning District.
		1. Implement recently amended Plan policy 4.4.6-a (Ord. 2017-004), related to the Mixed Use Planned Development (MXPDP) Zoning district, which: <ul style="list-style-type: none"> • Removed the ability for the MXPDP district to be applied with the High Residential - 12 (HR-12) or High Residential - 18 (HR-18) FLU designations, as MXPDP is intended to support intense commercial uses; and, • Clarify that consistency of an MXPDP with Multiple Land Use (MLU) Future Land Use (FLU) designation is only applicable for sites located in the Urban/Suburban Tier.
2.	ULDC Art. 3.E.4, Mixed Use Planned Development (MXPDP)	[Zoning] Implement recently amended Plan policy 4.4.6-a (Ord. 2017-004) which deletes the internal trip capture requirements for the MXPDP.

EXHIBIT E – Art. 3.B.14.f, Property Development Regulations [Related to WCRAO]

Part	Article	Reasons
1.	ULDC Art. 3.B.14.F, Property Development Regulations	<p>[Zoning] Ongoing efforts to provide additional clarity and guidance to staff and applicants in implementing the form based code principles outlined in the 2004 Westgate/Belvedere Homes Community Redevelopment Agency (WCRA) Redevelopment Plan.</p> <p>1. Clarify that Plazas and Squares are optional or otherwise to be accommodated within the WCRAO. Inclusion of the “heading” Plazas and Squares in the WCRAO Property Development Regulations (PDRs) table to recognize exceptions to building build to line PDR requirements, has repeatedly been misconstrued as establishing a requirement to provide plazas and squares.</p> <p>2. Re-organize exceptions to Build to Line requirements for ease of use.</p> <p>3. The proposed amendment clarifies that a provision allowing for an administrative reduction to building frontage requirements for small lots (where no side or rear access is applicable), is limited to the minimum reduction necessary to accommodate vehicular access to parking to the rear of the subject building. The revision also corrects a scrivener’s error by relocating a footnote. Confusion has occurred where applicants have attempted to cite the exception to allow for greater reductions than those anticipated, or where staff require more prescriptive guidance in the application of form based codes.</p> <p>Background: The consultant contracted by the WCRA to develop the framework for the code provisions necessary to implement the 2004 WCRA Plan, established expansive minimum building frontage requirements within key redevelopment areas, including the Westgate Avenue corridor. After consultation with PZ&B, this was reduced to 80 percent or less, including the language being amended, which was required by Zoning staff, in recognition of smaller lots that could not meet the stringent 80 percent requirement due to the need to allow vehicular access to parking to the rear of the building (again, where no side or rear access is applicable). The provisions are twofold, the first allows for a 50 percent reduction by right for any lot less than 100 feet in width, while the second limits the reduction to the minimum necessary to comply with other Code requirements.</p> <p>For example, development of a lot with 100 feet of frontage on Westgate Avenue, with no other frontages on the sides or rear, would dictate a building a minimum of 80 feet in width, which leaves 20 feet for side setbacks and vehicular access, among other requirements. However, the minimum access width required for two-way vehicular traffic is 25 feet. Additional width may also be required to accommodate perimeter buffers, safe sight corners, or pedestrian access ways, among other considerations. Hence, the inclusion by Zoning to allow for reductions commensurate such Code requirements would be the minimum necessary to allow a property owner the reasonable ability to redevelop, not a wholesale reduction.</p>

EXHIBIT F – Lifestyle Commercial Center (LCC)

Part	Article	Reasons
		<p>General Reason for Amendments: [Zoning] The Future Land Use Element (FLUE) of the Comprehensive Plan was recently amended by Ord. 2017-004, to delete the requirement that the Lifestyle Commercial Center (LCC) be a standalone zoning district that mirrored the Traditional Marketplace Development (TMD) district. Revised FLUE Policy 4.4.4-d (fka 2.2.2-c) relocates several minor LCC specific provisions under the TMD district, eliminating a number of redundant provisions, while retaining the LCC specific exception that allowed for an individual tenant to occupy up to a maximum of 100,000 square feet. The TMD is one of several types of mixed-use development, allowed in any location with frontage on an arterial or collector roads as indicated in FLUE Policy 2.2.2-a. In addition, the recent Plan amendment also clarifies that the LCC is only allowed in the Urban/Suburban Tier on sites assigned a commercial future land use (FLU) designation, for two sites approved under Ordinances 2008-048 and 2009-028.</p> <p>As a result, this amendment deletes the LCC as standalone zoning district throughout the ULDC; and, retains some LCC regulations not covered under TMD.</p>
1.	ULDC Art. 1.1.2, Definitions	[Zoning] See General Reason for Amendment above.

2.	ULDC Art. 2, Development Review Procedures	[Zoning] See General Reason for Amendment above. Delete references to LCC for consistency with recent amendments to FLUE Policy 4.4.4-d (fka 2.2.2-c), which allows for the LCC to be consolidated under the TMD district.
3.	ULDC Art. 3.A.1.B, Overlays and Zoning Districts	[Zoning] See General Reason for Amendment above. Delete references to LCC for consistency with recent amendments to FLUE Policy 4.4.4-d (fka 2.2.2-c), which allows for the LCC to be consolidated under the TMD district.
4.	ULDC Table 3.A.3.C – FLU Designation and Corresponding Planned Development Districts	[Zoning] See General Reason for Amendment above. Delete references to LCC for consistency with recent amendments to FLUE Policy 4.4.4-d (fka 2.2.2-c), which allows for the LCC to be consolidated under the TMD district.
5.	ULDC Table 3.A.3.C – TDD Corresponding Land Use	[Zoning] Correct glitch by deleting provisions indicating that the TMD district is consistent with the Commercial Low Office (CLO) and Commercial High Office (CHO) FLU designations. Comprehensive Plan FLUE Policy 4.4.4-a only allows TMD to be located on sites with Commercial High (CH) or Commercial Low (CL) FLU designation.
6.	ULDC Art. 3.E.1.B.2.f, LCC Minimum Density Requirements	[Zoning] See General Reason for Amendment above. Delete references to LCC for consistency with recent amendments to FLUE Policy 4.4.4-d (fka 2.2.2-c), which allows for the LCC to be consolidated under the TMD district.
7.	ULDC Art. 3.E.1.D.1, Pre-Application Conference	[Zoning] See General Reason for Amendment above. Delete references to LCC for consistency with recent amendments to FLUE Policy 4.4.4-d (fka 2.2.2-c), which allows for the LCC to be consolidated under the TMD district. Specific application procedures are in place for TMDs
8.	ULDC Art. 3.E, Lifestyle Commercial Center Development (LCC)	[Zoning] See General Reason for Amendment above. Delete references to LCC for consistency with recent amendments to FLUE Policy 4.4.4-d (fka 2.2.2-c), which allows for the LCC to be consolidated under the TMD district. As a result, this amendment deletes most of the LCC requirements and relocates specific LCC provisions related to Interconnectivity, Perimeter Frontage and Type 1 Waivers to be under the TMD as they are not covered under the TMD regulations,
9.	ULDC Art. 3.F, Traditional Development Districts (TDDs)	1. See General Reason for Amendment above. Delete references to LCC for consistency with recent amendments to FLUE Policy 4.4.4-d (fka 2.2.2-c), which allows for the LCC to be consolidated under the TMD district. 2. Delete reference to Live/Work use from TDD regulations as the use was removed from the Code through Ordinance 2017-007.
10.	ULDC Art. 3.F.4.C, Development Standards for All TMDs	1. See General Reason for Amendment above. Delete references to LCC for consistency with recent amendments to FLUE Policy 4.4.4-d (fka 2.2.2-c), which allows for the LCC to be consolidated under the TMD district. 2. Clarify the maximum square footage for a single tenant in a TMD with CL FLU designation is 65,000 sq. ft. when approved through BCC public hearing. Currently the regulation for the Urban/Suburban Tier in TMD limits single tenants to 50,000 sq. ft. and allows expansion via public hearing approval and further indicates single tenant more than 100,000 sq. ft as prohibited. In the other hand, Art. 5.I, Large Scale Commercial Development limits single tenant square footage to 65,000 sq. ft. in CL FLU designation. The proposed amendment looks to create consistency between Art. 3.F.4.C and 5.I. by limiting single tenants in TMDs with CL FLU designation to 65,000 sq. ft. and clarify that 100,000 sq. ft. limitation is applicable to sites expected with high intensity as CH FLU designation.
11.	ULDC Art. 3.F.4, Traditional Marketplace Development (TMD)	[Zoning] Establish regulations for TMDs in the Urban/Suburban Tier when developed in the form of LCC as requirements for LCC were modified from the Comprehensive Plan through Ordinance 2017-004 making LCC a type of TMD.
12.	ULDC Art. 4, Use Regulations	[Zoning] See General Reason for Amendment above. Delete references to LCC for consistency with recent amendments to FLUE Policy 4.4.4-d (fka 2.2.2-c), which allows for the LCC to be consolidated under the TMD district. [Zoning] See General Reason for Amendment above. Delete references to LCC for consistency with recent amendments to FLUE Policy 4.4.4-d (fka 2.2.2-c), which allows for the LCC to be consolidated under the TMD district.
13.	ULDC Art. 5, Supplementary Standards	[Zoning] Delete reference to LCC as the Zoning District is consolidated with TMD per revised Plan policy FLUE 4.4.4-d (fka 2.2.2-c) and contained in Ord. 2017-004.
14.	ULDC Art. 5, Supplementary Standards	1. Delete reference that exempts LCC from the requirements of Art. 5.C. related to recesses and projections. Requirements for LCC as a standalone zoning district were deleted from the Plan FLUE through Ordinance 2017-004. The revised Plan policy FLUE 4.4.4-d (fka 2.2.2-c) makes LCC a type of TMD and TMD primary and secondary frontage are not subject to the Architectural Guidelines in Art. 5.C. 2. Currently Art. 5 limits development in CL FLU to 65,000 square feet for single tenant with the exception of a specific geographic area. This amendment expands exception of square footage limitation for single

		tenants to 100,000 square feet for sites in the Urban/Suburban Tier and condition of approval requiring the use of LCC by Ordinances 2008-048 and 2009-028 as established in Plan policy FLUE 4.4.4-d (fka FLUE 2.2.2-c). Regardless of the provisions established by Ordinance 2017-004 allowing 100,000 square feet of single tenant in LCC, the site under Ord. 2009-048 is limited to 65,000 square feet.
		[Zoning] Delete reference to LCC as the Zoning District is consolidated with TMD per revised Plan policy FLUE 4.4.4-d (fka 2.2.2-c) and contained in Ord. 2017-004.
15.	ULDC Art. 7, Landscaping	[Zoning] Delete reference to LCC as the Zoning District is consolidated with TMD per revised Plan policy FLUE 4.4.4-d (fka 2.2.2-c) and contained in Ord. 2017-004.

Exhibit G – Article 4, Use regulations

Part	Article	Reasons
1.	ULDC Art. 4.A.9, Development Thresholds	[Zoning] Establish an additional reference to Art. 5.G, Density Bonus Programs within Art. 4.A.9, Development Thresholds, to ensure that those reviewing the ULDC are familiar with additional thresholds for residential projects utilizing the density bonus provisions of the Workforce Housing, Affordable Housing or Transfer of Development Rights Programs.
2.	ULDC Art. 4.B.1.C.3.d, Zoning Districts [Related to Multifamily]	<p>Correct Use Regulations Project revision which inadvertently changed the approval process for the Multifamily use in the Multifamily Residential (RM) Zoning District when located on parcels with a High Residential 8 (HR-8) Future Land Use (FLU) designation or higher.</p> <p>Under the Use Regulation Project (URP), Ordinance 2017-007, the Use Matrix for each Use Type has been amended to show the most restrictive approval process. The Use Matrix is showing Class A Conditional Use approval for Multifamily use in Residential Multifamily (RM) Zoning District which is intended to be only applicable to sites located in Medium Residential 5 (MR-5) Future Land Use (FLU) designation. This amendment clarifies that Multifamily use is Permitted by Right on sites with RM Zoning District with HR-8 or higher FLU designations.</p>
3.	ULDC Table 4.B.2.A – Commercial Use Matrix	<p>This amendment is to allow Microbreweries in Multiple Use Planned Development (MUPD) with an Economic Development Center (EDC) FLU designation, subject to a Development Review Officer (DRO) approval for the following reasons:</p> <ul style="list-style-type: none"> • The Comprehensive Plan dictates that an MUPD with EDC FLU designation is intended to have office and research parks as well as industrial uses with light industrial characteristics. • The Microbrewery use was developed to recognize the recent craft beer trend, which typically comprised of light industrial manufacturing and processing, storage and distribution in addition to commercial sales, brewery tours or education, and accessory tap rooms, which includes consumption on site. These use characteristics make Microbrewery a light industrial use. • In addition, MUPD developments are required to be subject to the Board of County Commissioners (BCC) approval, which allows for issues or concerns regarding site design or uses to be discussed publicly.

EXHIBIT H – Use Classification [Related to URAO]

Part	Article	Reasons
1.	Art. 4.B, Use Classification	<p>[Zoning] Reincorporate URAO Use Matrix note that was inadvertently deleted when Use Matrices were consolidated in Art. 4 as part of the Use Regulations Project.</p> <p>These uses were Permitted by Right in General Commercial (CG) Zoning District prior to the establishment of the Urban Center (UC) and Urban Infill (UI) Zoning Districts. The note serves to recognize the approval of those uses to be Permitted by Right when structural modifications are not taking place, the use operates indoor, and parking provisions are met.</p>

Exhibit I – Retail Gas and Fuel – Standards for Approval

Part	Article	Reasons
1.	ULDC Art. 4.B.2.C.16.d, Additional Standards for Approval	[Zoning] Delete redundant standards previously established for Retail Gas and Fuel uses, which are either redundant to existing Standards regulating site development, or must be demonstrated. Specifically, Art. 2.B.1.B.2, Consistency with the Code; Art. 2.B.1.B.3, Compatibility with Surrounding Uses; and Art. 2.B.1.B.5, Development Patterns, among others, already establish sufficient standards for uses requiring Class A Conditional Use approval. Similar standards would apply for Waivers or subsequent Development Order Amendments.

EXHIBIT J – Art. 5.B.1.A, Accessory Uses and Structures General Exceptions

Part	Article	Reasons
1.	ULDC Art. 5.B.1.A.1.b, Location	<p>[Zoning] The adoption of the 2003 Managed Growth Tier System (MGTS) Code rewrite [Ord. 2003-067] included an additional restriction on the location of accessory structures in front or side street yards. The ULDC definition of “yard” includes “any area that lies between a principal building or buildings and the nearest lot line”, which can be problematic where principal buildings exceed the minimum required setback, thus reducing the amount of land area where additional improvements may be made. While the change clarified that certain types of structures, such as clothes lines, may not be appropriate when placed in the front yard, it also created a number of non-conformities, or otherwise limited options for future renovations or expansion, emphasis on residential uses.</p> <p>As an example, it’s not uncommon for residential lots that back up to desirable open space areas such as the ocean, lakes, golf courses, equestrian trails, or nature preserves, among others, to locate living areas in close proximity to such amenities, as opposed to placement at the street. However, this configuration limits design options for detached accessory structures where prohibited in front “yards”. While less common in South Florida, there are also architectural trends that use multiple buildings connected with courtyards, decks, or walkways, which may not be permitted due to the front or side street yard prohibition. Lastly, there are a number of accessory structures that are commonly or obviously permitted within front or side-street yards, including fences and walls, entry features, as well as cabanas or other accessory structures that serve recreation amenities such as tennis courts, where there are no principal structures.</p> <p>Staff have identified a number of scenarios where accessory structures were permitted within front yards prior to 2003, as well as subsequent applications for variance relief, and determined that in most instances, such improvements were and should be accommodated, subject to minor limitations or standards ensuring compatibility with the surrounding community. Since reduced setbacks for accessory structures only apply in limited instances for side and rear property lines, unless exempt, accessory structures permitted in front and side-street yards would be subject to the same setbacks applicable to principal buildings.</p> <p>See also Exhibit G, Accessory Uses and Structures – Exceptions for Buildings Accessory to Residential</p>

EXHIBIT K – Art. 5.B.1.A, Accessory Uses and Structures\ Exceptions for Buildings Accessory to Residential

Part	Article	Reasons
1.	ULDC Art. 5.B.1.A.1.b, Location	<p>[Zoning] As outlined in Exhibit E, Art. 5.B.1.A., Accessory Uses and Structures – General Exceptions, the adoption of the 2003 Managed Growth Tier System (MGTS) Code rewrite [Ord. 2003-067] included an additional restriction on the location of accessory structures in front or side street yards. The ULDC definition of “yard” includes “any area that lies between a principal building or buildings and the nearest lot line”, which can be problematic where principal buildings exceed the minimum required setback, thus reducing the amount of land area where additional improvements may be made. While the change clarified that certain types of structures, such as clothes lines, may not be appropriate when placed in the front yard, it also created a number of non-conformities, or otherwise limited options for future renovations or expansion, emphasis on residential uses.</p> <p>As an example, it’s not uncommon for residential lots that back up to desirable open space areas such as the ocean, lakes, golf courses, equestrian trails, or nature preserves, among others, to locate living areas in close proximity to such amenities, as opposed to placement at the street. Exhibit L – Accessory Solar Energy Systems

Part	Article	Reasons
1	ULDC Art. 5.B.1.A.1.b, Location	[Zoning] Continuation of exceptions to structures in front and side street yards as outlined in Exhibit E, Art. 5.B.1.A., Accessory Uses and Structures – General Exceptions
2.	ULDC Art. 5.B.1.A.1.b, Location	<p>Reason for Amendment: [Zoning] This amendment serves to memorialize and expand upon the application of existing ULDC provisions that have historically allowed for accessory solar energy systems, to: 1) assist with the County’s SolSmart certification effort being coordinated through the office of the County Climate Change & Sustainability Coordinator; and, 2) a one-time Solar Tree Pilot Project, which Planning and Building collaborated on with Florida Power and Light (FPL) staff, to accommodate a solar tree installation at the FPL West County Energy Center.</p> <p>While the County has long accommodated accessory solar energy systems, most commonly in the form of rooftop solar or pool heating systems for single family homes, the same provisions also allow for similar installations on any other residential or non-residential building, or placement on standalone structures within back yards. This was further clarified in 2014 by an amendment acknowledging that such systems were exempt, for obvious reasons, from screening requirements for mechanical equipment. Similarly, existing provisions regulating height allow for an exception of up to five feet measured from a roof deck, for mechanical equipment, which accommodates the need for solar equipment placement, or movement, to best maximize exposure to the sun. Staff also confirmed in 2014 that there were no standards in Art. 5.C, Architectural Standards that would preclude the use of solar energy systems, including solar energy roofing materials.</p> <p>The County has been approved for participation in the SolSmart Host Advisor Program, which will help to facilitate the County’s effort to attain Solsmart designation, which is achieved through taking action to foster local solar market growth. This designation provides a number of benefits, including job creation, promoting sustainability, reducing greenhouse gases, among numerous other County goals. Notwithstanding existing and prior efforts to accommodate accessory solar energy systems, adding a specific reference will serve to better clarify these longstanding provisions, while furthering the County’s efforts to obtain SolSmart certification.</p> <p>The second component, acknowledges FPL or other similar efforts to promote solar usage, through collocation of accessory solar energy systems in the form of solar trees, which may be designed to provide a secondary function such as shade, public art, or similar. More commonly noted examples of these structures can be found at the FPL Manatee Center. Staff generally supports the solar tree concept, provided that such structures don’t adversely impact required landscaping, much less replace trees, or pedestrian or vehicular movement.</p>

EXHIBIT M - Art. 5.B.1.B, Temporary Structures – Portable Storage Containers and Shipping Containers]

Part	Article	Reasons
1.	ULDC Art. 5.B.1.B, Temporary Structures	<p>[Zoning]</p> <ol style="list-style-type: none"> Codify new industry trend to allow portable storage containers to be located temporarily on sites with residential uses. Containers are typically used to store household goods to be shipped or while a residential structure is under renovation. This amendment allows the use of one Permitted by Right container. It also establishes regulations to limit its onsite duration to 15 days; and, to dictate the maximum dimensions of the container consistent with the intensity of its intended use, to fit in driveways, and to avoid encroachment into vehicular or pedestrian pathways. A minimum side setback of 7.5 feet is necessary to ensure the structure is not placed too close to an adjacent property. Codify PPM ZO-O-066 related to Shipping Containers. The amendment allows the use of shipping containers as temporary structures for contractors to store construction materials on an on-

		<p>going construction site or building. The structure is proposed to be Permitted by Right, subject to the Building Division requirements.</p> <p>3. Recognize the use of Shipping Container as a permanent structure for storage purposes or to make it habitable. Clarify that a permanent Shipping Container will be treated like any other permanent structure, subject to Building and Zoning Code regulations.</p>

1.	ULDC Table 5.G.2.D, Review Process	1. Delete reference to Requested Use under the Density Bonus Review Process table. Requested Use was consolidated as Conditional Use through the Use Regulations Project.

Exhibit O – Art. 6, Parking

Part	Article	Reasons
1.	Table 2.D.6.B, Summary of Type 1 Waivers	[Zoning] Expand the list of Type 1 Waivers related to the reduction of loading spaces to include Type 3 CLF or Nursing Home or Convalescent Facility. See Part 2 below for details. The loading provisions proposed for these uses require one parking space per building which may not be necessary when the buildings are only housing dormitories or incidental services that do not require loading areas.
	Table 6.A.1.B, Minimum Off-Street Parking and Loading Requirements	<p>1. Amendment the loading space requirements for Congregate Living Facilities (CLF) and Nursing Home or Convalescent Facility as follows:</p> <ul style="list-style-type: none"> Delete regulations that require CLF or Nursing Home or Convalescent Facility to provide one loading space for each 50 beds for facilities containing 20 or more beds. This requirement may result in an unnecessary number of loading areas, sometimes larger than the number required for some industrial or commercial uses. Type 3 CLF allows for a higher number of beds based on the FLU designation than Types 1 and 2 since it is for more than 14 occupants. Type 3 CLF as well as Nursing Homes or Convalescent Facility typically require additional services incidental to the use operation which may result in the need of loading areas. This amendment requires one loading space per building mainly to address situations in which the site design places decentralized services in multiple building while allows applicants to apply for Type 1 Waiver. The waiver looks to address cases when can be demonstrated that a building or buildings do not include services or operations that are going to require loading areas. This amendment continues recognizing that Type 1, 2 and 3 CLFs with less than 20 beds are not subject to the loading requirements. <p>2. Update references to use classifications correct “Use Type” to “Use Classification” for consistency with recently amended Art. 4, Use Regulations.</p> <p>3. Under the Use Regulations Project, Convenience Store use, and accompanying parking and loading standards, were inadvertently deleted from the minimum off-street parking and loading requirements table. This amendment reinstated this use in Table 6.A.1.B - Minimum Off-Street Parking and Loading Requirements with no proposed modifications.</p> <p>4. Include parking provisions for recently split Financial Institution with Drive Thru Facilities use consistent with the same parking and loading requirements for the Financial Institution Use.</p> <p>5. Update references to use classifications correct “Use Type” to “Use Classification” for consistency with recently amended Art. 4, Use Regulations.</p> <p>6. Clarify parking provisions for the Microbrewery use. This use was recently added to Article 4, Use Regulations and parking provisions to address the processing aspect of the use were overlooked. This amendment clarifies that 1 parking space for every 3 seats is intended to apply to taproom area, while manufacturing areas including packing, distribution or storage, shall be subject to 2 spaces per 1,000 square feet, consistent with the parking provisions for the industrial use Manufacturing and Processing. Note also that accessory office uses are subject to separate parking requirements.</p> <p>7. Relocate and apply same parking provisions for Repair and Maintenance, Self Service Storage, and Vehicle Sales and Rental as they were split uses in Art. 4 through the Use Regulations Project.</p> <p>8. Update references to use classifications correct “Use Type” to “Use Classification” for consistency with recently amended Art. 4, Use Regulations.</p>

		9. Clarify parking regulations for Electric Distribution Substation as it was split from the Minor Utilities use in Art. 4 by Ord. 2017-007. The parking provisions are the same as in Minor Utility.
		10. See reason #1 above.
3.	Art. 6.B.1.D.2, Type 1 Waiver – Reduction of Minimum Number of Required Loading Spaces	[Zoning] Expand applicability of Type 1 Waivers to reduce loading spaces by including Type 3 CLF or Nursing Home or Convalescent Facility. The loading provisions proposed in these uses require one parking space per building which may not be necessary when the buildings are only housing dormitories or incidental services that do not require loading areas. Existing provisions are in place to ensure some criteria is met such as technical data that demonstrates on site loading demand.

Exhibit P – Art. 8.F.5, Illumination [Related to Signage]

Part	Article	Reasons
1.	ULDC Art. 8.F.5, Illumination [Related to Signage]	<p>1. Exempt Electronic Message Signs from Tier based limitations for internally illuminated signage, based on evaluation of existing standards and potential benefit to public versus potential for adverse impacts, including but not limited to:</p> <ul style="list-style-type: none"> ▪ Prohibitions on types of lamps utilized and message movement, and minimum standards for timing and instantaneous message change; ▪ Limitations on the types* of Electronic Message Sign Types permitted; and, ▪ 2014 ULDC updates, based on long term studies, evaluation or regulation of electronic signage, which included: <ul style="list-style-type: none"> ✓ Establishment of maximum brightness levels based on ambient light (e.g. daytime, rainy days, nighttime, etc.); ✓ Technological advancements and industry trends resulting in more accurate and reliable ambient light sensing technology to ensure that maximum brightness levels aren't exceeded, mitigating adverse glare and minimizing excessive light pollution; and, ✓ A default mechanism to shut the sign down in the event of a malfunction or failure. <p>This exception is based on current provisions allowing for Electronic Message Signs, and may warrant reconsideration should future amendments be considered.</p> <p>2. Update limits on internally illuminated signage within the Agricultural Reserve (AGR) Tier for commercial properties commensurate with recent amendments to the Comprehensive Plan.</p> <p>This amendment was initiated in response to BCC discussion and direction at the March 23, 2017 BCC Zoning Hearing pertaining to initiation of ULDC Amendment Round 2017-01. The topic was raised at the request of industry representatives for Cobblestone Plaza Multiple Use Planned Development (MUPD), which was requesting and subsequently obtained Variance from the internal illumination requirement relief on April 6, 2017. Note also that the Delray Marketplace Traditional Marketplace Development (TMD) had also previously obtained similar Variance relief as well. While the standards for sign illumination were originally calibrated with assistance from a consultant based on the characteristics of the 2003 Managed Growth Tier System (MGTS), recent amendments to the Comprehensive Plan to allow for additional commercial development and use of the MUPD district, merits re-evaluation. Factors considered, include:</p> <ul style="list-style-type: none"> • In addition to allowing additional commercial, the MUPD district allows for broader use of freestanding signs than was originally anticipated within the Tier under the previous TMD limitation; • Consideration that additional commercial development within the Tier will likely be limited to specific high traffic corridors within the Tier, where improved sign illumination may be warranted; and, • Expanding the current options for external or silhouette lighting for signage under the proposed commercial limitation may not significantly alter the original aesthetic vision for the Tier, nor efforts to control light pollution.

Exhibit Q – Art. 8.G.3.B, Electronic Message Signs

Part	Article	Reasons
1.	ULDC Art. 8.G.3.B, Electronic Message Signs	<p>1. Sunset the Electronic Changeable Copy Message Sign PRA Pilot Program pursuant to BCC discussion and direction at the March 23, 2017 BCC Zoning Hearing, pertaining to the Zoning Director update on the status of the PRA Pilot Program. The discussion affirmed ensuring that any signs approved during the timeframe the Pilot Program was in effect, would be considered conforming. Eligible signs will still be subject to the original standards for placement in the event of an application to relocate such signage, or the critical operational standards, which serve to mitigate any potential for adverse impacts.</p> <p>2. Streamline and simplify the evaluation and approval requirements for Type I Electronic Message Signs by consolidating requirements that the BCC make specific findings, with other Standards required to be considered as part of the Class A Conditional Use (BCC approval) process.</p>

EXHIBIT R – Department of Airports Chapter 333, Florida Statutes Update

Part	Article	Reasons
1.	ULDC Art. 1.F.3, Nonconforming Structure	<p>[Airports]</p> <p>Changes made in 2016 to Chapter 333, Florida Statutes (FS), Airport Zoning requires amendments to Article 16, with related amendments to Articles 1, 2 and 4, to be consistent with the recent statutory changes. An overview of the specific changes includes:</p> <ol style="list-style-type: none"> 1. Chapter 333 speaks to airport “obstructions” and “hazards”, which include not only permanent and temporary structures but other tall objects or terrain. 2. Updates to reference most current related documents. 3. Establishes an amended height review procedure to comply with Chapter 333.07. 4. Amendments to more clearly reference provisions within the ULDC or in other regulating documents. <p>Due to the recent (July 1, 2016) amendment of Chapter 333, Florida Statutes (F.S.), Airport Zoning, there have been changes to the statute with regard to the following:</p> <ol style="list-style-type: none"> 1) statutory requirement for political subdivisions to provide a copy of airport zoning permit applications to the Aviation and Spaceport Office (ASO) for review; 2) statutory requirement for political subdivisions to provide a copy of amended airport zoning regulations to the ASO upon adoption; and 3) the statutory requirement to enter into either an interlocal agreement or joint zoning board when one of two or more political subdivisions have land which underlies a Part 77 airport surface of an adjacent airport owned by another political subdivision. <p>These amendments are a result of a legislative action that occurred in July 2016. Specifically, House Bill 7061 contained several FDOT related statutes that included revisions to Florida Statutes Chapter 333, Airport Zoning, including but not limited to the following:</p> <ul style="list-style-type: none"> • 333.135(1) Any political subdivision having an airport within its territorial limits which has not adopted airport zoning regulations shall, by July 1, 2017, adopt airport zoning regulations consistent with this chapter. • 333.135(2) Any airport zoning regulation in effect on July 1, 2016, which includes provisions in conflict with this chapter shall be amended to conform to the requirements of this chapter by July 1, 2017. <p>Palm Beach County already has Airport Zoning Regulations adopted in the Unified Land Development Code, specifically within Article 16. Therefore, to comply with 333.135(2) these amendments are proposed to conform to the amended requirements.</p> <p>Other minor amendments to terminology and references are also being updated as part of these amendments for consistency within the ULDC.</p>

		<p>[Airports]</p> <ol style="list-style-type: none"> 1. This amendment clarifies that structures and other obstructions are reviewed as Nonconforming structures. 2. This amendment clearly specifies which regulated areas are exempt from these requirements 3. This amendment proposes terminology consistent with the definition of substantial modification.
		<p>[Airports]</p> <p>This amendment clarifies the discontinuance of a use, and the terminology proposed is consistent with similar provisions</p>
		<p>[Airports]</p> <p>This amendment is proposed to be consistent with the definition of substantial modification and the thresholds identified in Chapter 333. This amendment also addresses the total value of improvements as referenced elsewhere in Art. 1. As Chapter 333 establishes a threshold of 50% for improvement costs, the stepped thresholds of 50% and 80% currently referenced in the code are no longer applicable.</p>
		<p>[Airports]</p> <p>This amendment is proposed to clearly reference supporting provisions in the ULDC.</p>
2.	ULDC Art. 1.I. 2 Definitions	<p>[Airports/Zoning]</p> <ol style="list-style-type: none"> 1. The proposed amendments include new and amended definitions related to Art. 16 Airport Zoning and are being incorporated or amended into Art. 1 to be consistent with definitions in Chapter 333, Florida Statutes, Airport Zoning. 2. To delete definitions already addressed in Art. 4 as part of the Use Regulations Project.
		<p>[Airports/Zoning]</p> <p>This amendment allows for the deletion of this definition from Article 1. The definition was instated in Article 4 as part of the Use Regulations Project.</p>
		<p>[Airports/Zoning]</p> <p>The proposed amendment includes an amended definition related to Art. 16 Airport Zoning and is being proposed to be consistent with definitions in Chapter 333, Florida Statutes, Airport Zoning.</p>
3.	ULDC Art.2.B.3, Type II Variance	<p>[Airports]</p> <p>This amendment removes the opportunity to seek an Airport Variance due to amendments in Chapter 333 where the legislature removed the variance provisions.</p>
4.	ULDC Art. 3.D.1, Building Height	<p>[Airports]</p> <p>To be consistent with revised terminology used Article 16.</p>
5.	ULDC Art. 4.B, Use Classification	<ol style="list-style-type: none"> 1. To be consistent with revised terminology used Article 16 for Airport Land Use Compatibility Zoning. 2. To be consistent with the regulations in Chapter 333.03, Florida Statutes for locational criteria for restricted uses. 3. To be consistent with the PBAO
		<p>[Airports/Zoning]</p> <p>Prohibition of this use is only restricted to the Palm Beach International Airport Overlay (PBAO) as identified in Art. 3.B.9.</p>
		<p>[Airports/Zoning]</p> <p>Reference to Vertiport included in the definition as the term is used in Article 16.</p>
6.	ULDC Art.16, Airport Zoning	<p>[Airports]</p> <p>Changes made in 2016 to Chapter 333, Florida Statutes (FS), Airport Zoning requires amendments to Article 16, with related amendments to Articles 1, 2 and 4, to be consistent with the recent statutory changes. An overview of the specific changes includes:</p> <ol style="list-style-type: none"> 1. Chapter 333 speaks to airport “obstructions” and “hazards”, which include not only permanent and temporary structures but other tall objects or terrain. 2. Updates to reference most current related documents. 3. Establishes an amended height review procedure to comply with Chapter 333.07. <p>Amendments to more clearly reference provisions within the ULDC or in other regulating documents.</p>
		<p>[Airports]</p> <p>This amendment clearly indicates that there are supporting Maps and Schedules that identify specific areas, zones and uses that are referenced in Art. 16, and that these Maps and other documents may be obtained from the Department of Airports.</p>

	<p>[Airports] This amendment reflects the terminology used in Chapter 333 Florida Statutes, Airport Zoning for Airport Hazards, and to amend references to be consistent with airports obstructions and hazards as identified therein.</p>
	<p>[Airports] The amendments to Tables E-1, G-2 and G-3 are being made due to changes to the runway numbering recently implemented. These amendments also included changes to the dimensions of the RPZ.</p>
	<ol style="list-style-type: none"> 1. Amendments to Chapter 333.07 require the local government to permit airspace obstructions. These amendments provide for a procedure for the Department of Airports to review for obstructions through the Development Review Officer and Building Permit processes. The Department of Airports is already integrated into these processes as a member of the DRO and a reviewing agency through the Building Department. The amended provisions outline the process by which obstructions will be reviewed by the FAA, Department of Airports and FDOT. 2. References to Tall Structure Permit review is being removed as it will be replaced by the Permit for Obstruction review that will be accomplished through the DRO and/or Building Permit processes.
	<p>[Airports] This amendment reflects terminology referenced in Chapter 333, Florida Statutes for determining incompatible uses on properties surrounding airports.</p>
	<p>[Airports] This amendment establishes a procedure for review of land uses in proximity to Airports to comply with Chapter 333.03(2). This amendment provides for a procedure for the Department of Airports to review land use compatibility through the Development Review Officer and Building Permit processes. The Department of Airports is already integrated into these processes as a member of the DRO and a reviewing agency through the building Department.</p>
	<p>[Airports] This amendment references the prohibited uses by the naming convention used in Art. 4 - Use Regulations.</p>
	<p>[Airports] This amendment identifies Landfills as a restricted use in Chapter 333.03(2)(a).</p>
	<p>[Airports] This amendment removes the opportunity to seek a Variance due to amendments in Chapter 333 where the legislature removed the variance provisions.</p>
	<p>[Airports] This amendment reflects the process by which airport signage is currently reviewed and implemented</p>
	<p>[Airports] This amendment references where Maps and other documents are available and to correct reference numbers.</p>

2. Build to Line and Frontages

a. Build to Line

~~The build to line may be adjusted by the DRO, or at Building Permit review for projects Permitted by Right, to accommodate requirements such as increased R-O-W buffers due to location of existing utility easements, or required corner clips. The first three floors of all main structures, excluding parking garages, shall be constructed at the build to line, unless specified otherwise. An additional ten or 12 foot setback is permitted where a gallery is used in lieu of an arcade. Up to 25 percent of the building frontage or footprint that is required to be on the build to line may be either setback or projected beyond the build to line to accommodate requirements for balconies, stoops, porches, or other architectural features designed to enhance the pedestrian streetscape environment, provided that ground floor improvements do not conflict with the placement of street trees. Recesses and projections of the building façade up to a maximum of three feet shall be permitted. Maximum encroachments for balconies, and entryways shall comply with Table 3.B.14.G – WCRAO Supplementary Standards by Sub-Area. [Ord. 2006-004] [Ord. 2011-001]~~

1) General Exceptions

The following exceptions to the build to line shall be permitted by right:

- (a) An additional ten or 12 foot setback is permitted where a gallery is used in lieu of an arcade.

- (c) Recesses and projections of the building façade up to a maximum of three feet.
- (d) Plazas and squares are optional. References to such shall not be misconstrued as a requirement, except that dimensions for Plazas and Squares shall be met when applied as an exception to Build to Line in accordance with Art. 3.B.14.F.2.a, Build to Line. EXHIBIT E

ART. 3.B.14.F, PROPERTY DEVELOPMENT REGULATIONS [RELATED TO WCRAO] SUMMARY OF AMENDMENTS (Updated 6/7/17)

The build to line may be adjusted by the DRO where a site plan is required, or at Building Permit review for projects Permitted by Right, to accommodate requirements such as increased R-O-W buffers due to location of existing utility easements, or required corner clips.

b. Minimum Building Frontage

- 1) The minimum building frontage shall be in accordance with the requirements for each Sub-area and Figure 3.B.14.F, WCRAO Sub-area Building Configurations and Lot Placements. The portion of the structure required to meet the building frontage shall be located on the build to line unless otherwise stated. ~~Frontage requirements may be reduced for lots with no rear access to required parking, or to accommodate a drive aisle to the rear of the lot and required landscaping.~~ [Ord. 2006-004] [Ord. 2010-022] [Ord. 2011-001] [Ord. 2015-031]

(a) Minimum Building Frontage Small Lot Exception

This provision is established for lots that only have frontage on one street, or where side or rear access to required parking is unobtainable, or where a narrow lot with side or rear access cannot meet minimum building frontage and setback requirements. The minimum building frontage may be reduced, provided that the reduction shall be the minimum necessary to accommodate required side setbacks, perimeter buffers, foundation planting areas and a maximum of one vehicular access point for required parking, as well as any pedestrian sidewalk up to five feet in width.

Figure 3.B.14.F – Typical Example of Minimum Building Frontage Exception

Typical example of how Minimum Building Frontage Exception is calculated:

- Lot frontage = 150'
- Neighborhood Commercial (NC) Sub-area requires a minimum 80 percent Building Frontage per Table 3.B.14.F, WCRAO Sub-area PDRs.
- 150' x 80% = Minimum Building Frontage of 120' required.
- If no side or rear access, Minimum Building Frontage may be reduced to accommodate the following ULDC requirements: 10' Side Setback (includes typical 5' Compatibility Buffer); 8' side Foundation Planting area; 5' foot sidewalk; 25' Access Way; and, typical 5' Compatibility Buffer.
- Reduction is taken from Lot Frontage: 150' – (10' + 8' + 5' + 25' + 5') = Minimum Building Frontage of 97'.

The LCC may be a transitional form of development located adjacent to properties with a residential future land use or Zoning district. The layout typically supports an open air, traditional market place design configuration, which consists of one or more main streets with integrated in-line tenants and may include limited freestanding tenants.~~

~~LCC regulations are established to provide predictability in the built environment with a degree of design flexibility while ensuring compatibility, interconnectivity and intensity issues are addressed. [Ord. 2010-005]~~

~~2. Applicability~~

~~The requirements of this Section shall apply to all LCCs. [Ord. 2010-005]~~

This interface shall be comprised of the following: site layout, building form, interconnectivity, and mixed of uses that will support the surrounding residential uses. The LCC shall be laid out with one or more main streets that incorporate any in-line large tenant that is designed as a multi-tenant store front. It may also include a freestanding large tenant and outparcel tenants that are located outside of the main street. [Ord. 2010-005]~~

~~1. Site Layout~~

~~a. Street~~

~~Streets within an LCC shall be designed to create block configurations composed of main streets, secondary streets and alleys, as defined in Art. 3.E.8.C.3, Site Layout. [Ord. 2010-005]~~

1 residents and property in areas surrounding PBC Airports; to promote the full utility of PBC Airports and
2 public use airports; to provide structure height standards for airport hazards and uses within airport primary,
3 horizontal, conical, approach and transitional surfaces so as to encourage and promote ~~the proper and~~
4 ~~sound compatible~~ development of land beneath said areas; and to provide administrative procedures for
5 the efficient and uniform regulation of all development proposals within said zones.

6 Section 2 Short Title and Authority

- 7 A. This Article shall be known and cited as the "Airport Zoning Ordinance."
8 B. This Article is enacted pursuant to the provisions of Art. VIII, Sec. 1(g) of the Florida Constitution;
9 Chapter 125, F.S. § (1995) Chapter 333, F.S. § ~~(1995)~~ (2016), or as amended.

10 Section 3 Applicability

- 11 A. This Article regulates height and land uses around publicly owned airports in PBC. The height
12 standards for structures or obstructions provide maximum height limits and a review procedure to
13 determine if structures or obstructions will have an adverse impact on safe and efficient airspace
14 use. The land use standards provide restrictions and a review procedure within four nautical miles
15 of publicly owned airports to determine if the land use is compatible with normal airport operation
16 and Federal Aviation Administration (FAA) guidelines. The land use standards apply to the highest
17 most restrictive airport hazard areas and Noise Zones, and limit uses which include, but are not
18 limited to, hazardous material storage, emissions of light or smoke, or uses which attract
19 concentrations of people or birds.
20 B. This Article applies to all land in unincorporated PBC.
21 C. This Article also applies to all municipalities that may elect to participate through interlocal
22 agreement, pursuant to Chapters 163 and 333.03, (1)(b)1, Florida Statutes, ~~or to all affected~~
23 ~~municipalities if a Joint Airport Zoning Board is created pursuant to F.S. §333.03 (1) (b) 2, (1994).~~
24 D. These regulations supplement other land development regulations in this Code.
25 E. Where there exists a conflict between any of the regulations or limitations prescribed in this Article
26 and any other regulations applicable to the same area, the more stringent limitation or requirement
27 shall govern and prevail.

33 CHAPTER B ~~AIRSPACE HEIGHT REGULATION~~ AIRPORT PROTECTION ZONING REGULATIONS 34 GOVERNING AIRPORT HAZARDS

35 Section 1 Airspace Height Regulations

36 A. General

37 In order to carry out the provisions of this Article, there are hereby created and established certain
38 zones which include all of the applicable land lying beneath the primary, horizontal, conical,
39 approach, and transitional surfaces as they apply to a particular airport. To regulate height, an
40 Airspace Notification Map, ~~(attached as Appendix 1),~~ and a procedure to review ~~the permitting of~~
41 ~~and permit tall structures obstructions~~ has been established. Airport height limitations and the
42 notification procedures established in this Section conform to the standards for determining
43 obstructions to air navigation of Federal Aviation Regulations Part 77, ss. 77.23.

44 B. Regulated ~~Construction Obstructions~~

45 For purposes of this Section, ~~construction obstructions~~ includes but ~~is are~~ not limited to, any existing
46 or proposed permanent or temporary object, natural growth or creating new structures, or adding
47 height to any existing structure and shall include the location of derricks, draglines, cranes and
48 other boom-equipped machinery. ~~Construction Obstruction~~ does not include any development
49 which does not have the effect of adding height to the land or other structure, such as paving,
50 draining or roofing.

51 C. Regulated Areas

52 The various surfaces displayed as Zone 1 and Zone 2 on the PBC "Airspace Notification Map" are
53 defined below. Penetration of one of these zones shall require a technical analysis by FAA and

SUMMARY OF AMENDMENTS
(Updated 05/24/17)

1 **5. Transitional Zone Definition**

2 The area extending outward from the sides of the Primary Zones and Approach Zones
3 connecting them to the Horizontal Zone. Height limits within the Transitional Zone are the same
4 as the Primary Zone or Approach Zone at the boundary line where these Zones meet (i.e., level
5 with the nearest point on the runway centerline) and increase at a rate of one foot vertically for
6 every seven feet horizontally, with the horizontal distance measured at right angles to the
7 runway centerline and extended centerline, until the height matches the height of the Horizontal
8 Zone, the Conical Zone or for a horizontal distance of 5,000 feet from the side of the part of the
9 Precision Approach Zone that extends beyond the Conical Zone.

10 **a. Transitional Zone Height Limitation**

11 No ~~object or~~ structure or obstruction will be permitted within the Transitional Zone greater
12 in height than the Primary Zone or Approach Zone at their adjoining boundary lines
13 increasing at a rate of one foot vertically for every seven feet horizontally, with the
14 horizontal distance measured at right angles to the runway centerline and extended
15 centerline, until the height of the slope matches the height of the Horizontal Zone or the
16 height of the Conical Zone and for a horizontal distance of 5,000 feet from each side of that
17 part of the Approach Zone for a Precision Instrument Runway extending beyond the
18 Conical Zone.

19 **6. Terminal Navigational Aid Obstruction Zone Definition**

20 Operation of a Navigational Aid Facility is electromagnetic in nature therefore, objects
21 constructed off of airport property may have an adverse ~~affect~~ effect on the safe and efficient
22 operation of navigational facilities. An Airport Surveillance Radar (ASR) facility Navigational
23 Aid Obstruction Zone has been established extending in all directions to a radius of 3,500 feet
24 from the navigation aid. This zone is shown on the Airspace Notification Map, Appendix 1.

25 **a. Terminal Navigational Aid Obstruction Zone Limitation**

26 No construction or alteration or installation of any electromagnetic device shall be permitted
27 within this Navigation Aid Obstruction Zone without prior technical review by the FAA. If
28 deemed necessary by the results of the FAA review, ~~approval~~ a Permit for Obstruction
29 must be obtained from DOA following a review by the DOA and PZB.

35 This primary zone height limitation is described by a horizontal plane at the elevation
36 of the established elevation.

37 **b. Approach Zone Definition**

39 same width as the Primary Zone and extends outward and upward for a horizontal distance
40 of 4,000 feet where its width is 500 feet.

41 **1) Approach Zone Height Limitation**

42 The Approach Zone height limitation is a slope of one foot vertically for every eight feet
43 horizontally.

44 **c. Transitional Zone Definition**

45 The Transitional Zone extends outward and upward from the lateral boundaries of the
46 Primary Zone and from the Approach Zone for a distance of 250 feet measured horizontally
47 from the centerline of the Primary and Approach Zones.

48 **1) Transitional Zone Height Limitation**

49 The Transitional Zone has a height limitation at a slope of one foot vertically for every

25 CHAPTER C AIRPORT LAND USE COMPATIBILITY ZONING REGULATIONS

26 Section 1 Airport Land Use Regulations

27 A. General

28 In order to carry out the provisions of this Article, there are hereby created and established certain
29 zones which include all the land lying beneath the Runway Protection Zone (RPZ) and within Airport
30 Land Use Noise Zone(s) (ALUNZ), as they apply to a particular airport. All areas defined as the
31 RPZ and areas displayed as ALUNZ in Appendices 2 through 7 and 9 through 14 are subject to
32 review and technical analysis by DOA, PZB, and other applicable governmental agencies, in
33 consultation with PZB, in accordance with this Article.

34 To regulate land uses within these zones, an Off-Airport Land Use Compatibility Schedule
35 Appendix 8, maps and review procedures have been established. The RPZ dimensions are defined
36 in Table 16.B.1.E-1, Runway Category and Runway Protection Zone (RPZ) Defined, by Airport. The
37 noise zones are depicted on the Airport Land Use Noise Maps, ~~(Appendices 9 through 14).~~

38 B. Regulated Land Use

39 Notwithstanding any other provisions of this Article, no use may be made of land or water within
40 the RPZ in such manner as to interfere with the operation of an airborne aircraft. The Off-Airport
41 Land Use Compatibility Schedule, Appendix 8, shall be used to determine additional land
42 development requirements for uses identified in Article 4, Use Regulations. Those activities and
43 land uses not specifically listed in the Airport Land Use Compatibility Schedule are permitted or
44 restricted based on their similarity to noise tolerance and compatibility with normal airport
45 operations as exhibited by the activities and land uses which are listed in the Schedule.

46 1. Construction, defined

47 For purposes of this Section, construction includes but is not limited to creating new structures,
48 making alterations or repairs and additions to any existing building or structure, or moving or
49 relocating a building(s) or structure(s) within a Regulated Area. Construction does not include
50 paving, drainage or similar types of ~~construction~~ improvements.

51 2. Review Procedure for Regulated Land Use

52 All new construction or reconstruction for temporary or permanent uses shall be reviewed for
53 compliance with the standards of this Section in accordance with the development review
54 procedures in Article 2, Development Review Process, or at the time of application for a building
55 permit. Prior to issuance of a development order or a building permit, the DOA, in consultation
56 with PZB, shall review the application for compliance with this Article.

57 C. Regulated Areas

58 To regulate land uses within the RPZ and ALUNZ, and Off-Airport Land Use Compatibility
59 Schedule, maps and review procedures have been established. Only the portion of the lot falling

46 Pahokee), Belle Glade Municipal Airport, and Palm Beach North County Airport**

47 Land Use Noise Zones for these airports are established as the land lying within parallel
48 lines 9,108 feet in both directions from the approach and departure end of each runway,
49 the runway centerline, and all airspace in between. These zones are established and
50 attached as Appendices 11 through 14.
